

JNT Group is one of the largest producers, importers and distributors of wine in the world

JNT GROUP

JNT Group is a leading distributor of wines with a wide portfolio, specializing in importing and distributing high-quality wines from various regions around the world.

The company enjoys recognition in the wine industry and serves retail networks, restaurants, as well as individual customers.

Implementation of the Cygna Auditor Platform solution at JNT Group

Challenge

JNT Group, as a distribution company, had to face certain challenges related to managing access to key resources, including the Active Directory system, which is a crucial element of the company's IT infrastructure. The main issues included:

- Inadequate access control: Existing tools did not provide full visibility and control over who has access to resources in the Active Directory system.
- Data confidentiality assurance: Due to the sensitivity of data, especially concerning customers and suppliers, the company had to ensure their complete confidentiality and integrity.
- Permission management: Managing user permissions in the Active Directory system was complex and required automation and auditing to ensure compliance and security.

Implementation Steps

- Requirements Analysis: The EMS Partner team of specialists conducted a detailed analysis of the company's requirements, identifying key areas for monitoring and access management in the Active Directory system.
- Installation and Configuration: The Cygna Auditor Platform system was installed and configured, taking into account the unique needs and structure of JNT Group.
- Staff Training: Training sessions were conducted for JNT Group staff on using the features offered by the Cygna Auditor Platform and interpreting reports and alerts.
- Testing and Optimization: After implementing the system, performance testing was conducted, and configuration optimization was performed to ensure optimal functionality.

Benefits

- Full control over access: With Cygna Auditor Platform, JNT Group gained full visibility and control over access to resources in the Active Directory system, enabling a rapid response to unauthorized activities.
- Data confidentiality assurance: The Cygna Auditor Platform system enabled the company to monitor and audit user actions, contributing to an increased level of data security.
- Automation of permission management: With Cygna Auditor Platform, JNT Group gained the ability to automate permission management processes in the Active Directory system, leading to streamlined operations and increased efficiency.
- Through the implementation of the Cygna Auditor Platform system, JNT Group achieved significant improvement in its capabilities for monitoring, managing, and securing resources in the Active Directory system, strengthening its position in the market and earning customer trust.

Solution

After assessing the company's needs, JNT Group decided to implement the **Cygna Auditor Platform** system, which offers advanced monitoring, auditing, and access management features in the Active Directory system.
